Environmental Policy Statement

Having undertaken a thorough environmental review of our day-to-day operations, we recognise that inevitably we have an impact on the environment. We consider environmental protection to be an integral part of good business practice and as such wish to minimise the potentially harmful effects of such activity whenever and wherever it occurs.

We are committed to using new environmental technologies in the production of our traffic control products. A prime example of this is our solar powered, (non-polluting) road signs.

The PWS Group is committed to:

- The continual improvement of our environmental performance, through the establishment of environmental objectives and targets, and the prevention of pollution.
- Compliance with all relevant legislation, regulation and other requirements to which we subscribe.
- Maintaining an Environmental Management System in line with the requirements of BS EN ISO 14001: 2004.
- The reduction and minimisation of its negative environmental impacts, in particular
 - The recovery, recycling and disposal of waste arising from the processes;
 - The reduction in energy consumption associated with its operation.
- Providing the necessary training and support for its employees to ensure that they can fulfil the commitment stated in this policy.
- Comply with National Highways Sector Scheme 9A
- Comply with the European standard EN 12899-1:2007 for CE Marking traffic signs
- Working with suppliers, contractors and other relevant bodies to develop an effective approach to environmental protection, in order to minimise their own impact on the environment.

This environmental policy shall be circulated to all staff and people working for or on behalf of the organization. It will be made available to interested parties upon request. It shall be periodically reviewed and revised to ensure that environmental issues arising for new developments within the PWS Group, and within the companies we supply, are addressed and incorporated as appropriate.

Signed: *Ciaran McAteer*
