

MegaFlecta Impact Resistant Bollards

Passively Safe - Survives Multiple Impacts

Available in heights of up to 1450mm the TMP MegaFlecta is an impact resistant sign/bollard ideal for use in Traffic Islands, Traffic Calming Schemes, 2 Plus 1 Lane systems and is ideal for use on high speed roadways.

Providing regulatory signage (keep left, keep right etc.) in diameters from 450mm to 750mm the MegaFlecta bollard is available as both a single and double aspect sign. Mounted on a unique base system to support the double or triple post assembly, the signs are simply attached to the supporting cast-in cage system at the time of installation.

MegaFlecta bollards are fast and easy to install, using the cast-in cage supplied with the bollard. Faced with 3M Diamond Grade reflective sheeting, they provide superior level of daytime and nighttime visibility.

- Diamond Grade DG3 Fluorescent Microprismatic Reflective sheeting
- Reflective will not crease - 12 year delamination guarantee
- One-piece construction - will survive multiple impacts
- Single or double sided available
- strong vandal-resistant construction
- Low maintenance
- Passively safe
