Keep Left, Keep Right, No Entry etc

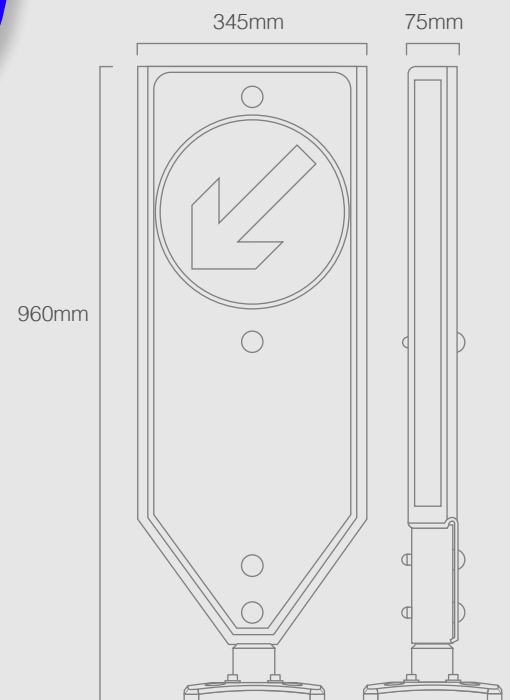

Details

The Flecta Impact Resistant Bollard is a robust, passively safe bollard which is fully compliant with BS8442:2014. Flecta Bollards offer unsurpassed visibility thanks to the use of 3M Diamond Grade DG3 Fluorescent Yellow Grade Microprismatic reflective sheeting.

They have been crash tested in accordance with EN 12767:2007 "Passive Safety Support Structures for Road Equipment" and are rated 100NE4 - the highest possible rating. Incorporating a patented base system, the bollard is able to withstand multiple impacts and the unique anti-twist mechanism ensures correct realignment with the traffic following a collision. These passive safety features along with quick and easy installation and low onward maintenance help the Flecta Bollard improve safety for all road users.
