- **Ideal for urban locations/footpaths/cycle lanes/carraigeway centrelines**
- **Strong, vandal-resistant construction**
- **Fast & easy to install**  
Reduces risk to installation personnel.
- **Low Maintenance & Passively Safe**
- **Fluorescent Diamond Grade Reflective**  
Superior day and night-time visibility.
- **CE Certified**  
EN12899(3)- 2007.

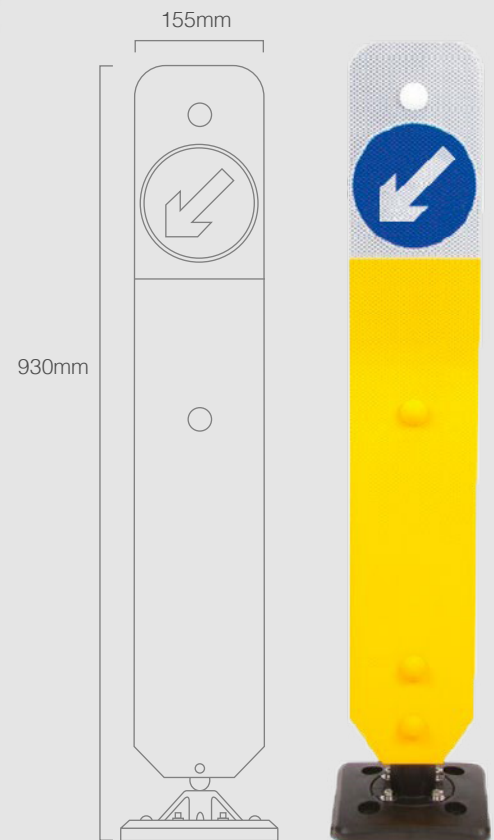

## Fully Impact Resistant

Survives multiple impacts, ensuring the Bollard continues to function and provide a clear warning to road users.

## Details

The Bollard's narrow width (155mm) coupled with the use of 3M Diamond Grade DG3 Fluorescent reflective sheeting ensures maximum visibility to motorists, cyclists and pedestrians. They are available in a variety of designs and formats, in both single sided and double sided configurations.

They are ideal for delineating urban locations, footpaths, cycle lanes and carraigeway centrelines as their narrow profile coupled with high visibility ensure they provide clear guidance for road users while not taking up much space. They are quick and easy to install and this minimises the amount of time the installer is working on a live road, thus improving safety for the installation crew. The Bollard's ability to survive multiple impacts means they offer exceptional value and will continue to function for extended periods.

<b>Overall Height</b>	930mm
<b>Width</b>	155mm
<b>Bicycle Symbol</b>	150mm Dia
<b>Keep Left/Right Arrow</b>	150mm Dia
<b>Fixing</b>	4 Bolts or foundation cage
